

June 5, 2020

Dear Family & Friends,

This week we completed the testing of all the Residents. We are waiting to hear the results for the final 40 Residents by the end of this weekend. Next week, we hope to start testing more employees as we finally have access to sufficient testing swabs. We have been so blessed to have no cases of COVID-19 among our Residents and Little Sisters. Thus far, all of our Residents, Sisters, and employees who have been tested are negative.

We look forward to summer arriving later this month and hopefully can plan for some small group picnics on our large porch. This has been a difficult time for many people, but we assure you we are continuing our efforts to keep our Residents safe here in our Home. Activities continue as do FaceTime calls and window visits as much as possible with the Residents.

As many states are beginning to "reopen", questions arise as to how and when our Home will open up. This is a difficult decision especially concerning the vulnerable population living at our Home. Right now we are being very cautious to keep the virus away and will continue to follow the guidelines of the Pennsylvania Department of Health, the Centers for Disease Control and CMS in knowing when to safely open our doors to family, visitors or volunteers again.

Until then, let's continue to pray for one another!

United in Prayer,

*Mother Mary Vincent, ISP  
Administrator*
