

January 11, 2021

Dear Family & Friends,

Happy New Year! May 2021 bring you many blessings!

I'd like to provide a quick update concerning our testing for Covid-19. The week of December 14th we previously reported an employee testing positive. On the week of December 21st another employee tested positive. Two additional employees tested positive the week of December 28th. These last two employees worked directly on the Resident households. In response, we then tested all nursing home Residents. Thankfully all Resident tests were negative and all other employees with interaction with the positive staff were also negative. The results from the week of January 4th were all negative.

Our weekly Covid-19 tests will continue. Many of these staff cases have been asymptomatic and the employees were able to quarantine at home. We will continue to monitor all Residents as there is high community spread in the Pittsburgh area.

Please keep praying for negative results on our weekly tests. We are looking forward to our second vaccination day, scheduled later this month. Thank you.

May God bless you,

Mother Mary Vincent, lsp
