

December 31, 2020

Dear Family & Friends,

Yesterday was a very joyous day here in our Home! CVS Pharmacy, in collaboration with the Federal Government, was here to administer the first injections of Pfizer's Covid-19 vaccine to all Nursing Home Residents, Sisters and Staff who consented to receive the shot. We pray that this is the first step toward normalcy in 2021. We are thankful to have this opportunity for our Residents and staff. CVS will return in three weeks to administer the booster and provide the first dose to those that missed it yesterday. The apartment Residents were not offered the vaccine at this time due to the programs criteria for eligible recipients. We hope that they will have the opportunity soon to receive the vaccine.

We have decided to temporarily pause indoor visits. With the rising cases locally and the vaccines just arriving at our Home, we feel it is best to take a precautionary approach and limit outside interactions until most Residents receive the second dose. We will keep you informed of our plans to re-open the auditorium for visits. Thank you for understanding our position in keeping everyone as healthy as possible.

Looking forward to a happy and healthy 2021! May you be blessed abundantly in the New Year! Thank you for your continued prayers.

May God bless you,

Mother Mary Vincent, lsp
Administrator
