

February 5, 2021

Dear Family & Friends,

Today I write to you with some mixed news, one of the covid positive Residents was hospitalized last week. They have returned home and we are praying they recover. There have been no new positive cases since last week when an employee tested positive from the same nursing household that was experiencing the other positive Resident cases, which were previously reported. We will have lifted the lockdown of the affected household today.

Next Wednesday February 10th, CVS Pharmacy will return for the 3rd time to give the second booster to those who received the first injection on January 20th. Once these boosters are administered we will have mostly all Residents fully vaccinated including those in the independent living apartments.

Keep praying that all the weekly tests continue to be negative for Covid. Thank you for all that you do for our Home!

May God bless you,

Mother Mary Vincent, lsp
