

June 1, 2021

Dear Family & Friends,

The month of May was very positive all around! As we reported in our last communication, fully vaccinated employees no longer need to be tested unless symptomatic. Unvaccinated employees must be tested once a month now because the positivity rate in our county has dropped below the 5% threshold. This is wonderful news!

We continue to make steps toward normalcy — the Residents are enjoying activities together with other households, the apartment Residents have returned to their dining room and are no longer having “take-out” only, and we can see Residents smiling faces as they stroll through the hallways!

Thank you for being there for us during all of this. We pray that as the virus subsides we will be able to open our home more to visitors, family members and return to having in-person events. We are almost there! Please continue to pray for us!

Gratefully in Prayer,
